

Dear GEICC Member-

The Georgia Department of Education has subscribed to a new resource to help connect students to YOU through the platform - **YouScience**. Employers can register their companies making them more visible to students through the **YouScience** Employer Connection Portal. [Here is the link to sign up.](#)

The YouScience Employer platform allows students to identify companies that align with their career pathway. We need the energy industry represented to ensure Georgia students are aware of what our industry offers!

Are you ready to find your future workforce?

Registration will take you 3-5 minutes and it's FREE! This is an incredible opportunity to fill your workforce pipeline! **BE SURE TO HAVE YOUR COMPANY LOGO READY TO UPLOAD.** All students in High School and Tech College have access to the platform.

What is YouScience and why does it matter to local businesses?

YouScience is an aptitude-based career guidance tool being used in all Georgia High School and Tech Colleges to help our local talent identify best-fit careers.

I have Cayla with **YouScience** copied. She is ready to personally help you create your listing. If you have any questions, please feel free to let either of us know! [You can schedule with her directly here.](#)
